Does not contribute to or support survival or growth of microorganisms.

定制 Customization

是指定做特殊的长度、宽度、外观和结构。

具体需求请咨询。

Refers to special: (1) lengths, (2) lengths and widths or (3) shapes and configurations, also referred to as Full Custom.

防静电 ESD(Electro-Static Discharge)

人体易产生静电,若接触到敏感电子元器件或设备会将其损坏。而当人体站在或接触到防静电的地垫上,人体上的静电便会消除掉。

When static builds up on a person's body and that person touches another object, the static charge is passed onto the object. This discharge can harm sensitive equipment, but is minimized when the person steps on or touches a Conductive or Static Dissipative mat.

使用年限 Life Expectancy

地垫的使用年限可以相差很大,缘于如下的多种因素:每天移动次数,人流量,接触油、腐蚀性化学物质或液体,温度过高,清洗和维护频率,场地,等等。以下是我们的客户使用经验的综合表现(不同客户的使用会有所差异):

5年及以上:尼龙66毡面地毯型地垫

3至5年: PVC耐磨层抗疲劳地垫、纯橡胶地垫

1至3年: PVC材质地垫、丙纶毡面地垫、PVC经济型抗疲劳垫

The life expectancy of a mat can vary dramatically depending on a multitude of factors such as:

number of shifts per day, amount of foot traffic, exposure to oils, caustic chemicals or fluids, excessive temperatures, cleaning and maintenance schedule, compound, etc.

The following is general representation of what our customers experience (your experience may vary):

5 Years or more - Urethane Mats

3 to 5 years - SpongeCote Mats

1 to 3 years - Molded Rubber Mats/Molded PVC Mats/ PVC Sponges

天然橡胶 Natural Rubber

从特定的树木和植物获得的乳胶加工而成的弹性体物质,具有优良的拉伸强度、耐磨性、柔韧性和弹性。但其耐溶剂和耐油性较差。耐温范围为-55°C~82°C。适用于干燥区域或有水区域。

Latex from certain trees and plants is processed into an elastomer with excellent tensile and abrasion resistance, flexibility and resilience; but it has poor resistance to solvents and petroleum products. Useful temperature range is -55oC to +82oC. It performs best in dry areas and when exposed to water.

丁腈橡胶 NBR

丙烯腈和丁二烯的共聚物。具有优良的物理性能,抗水耐油。耐温范围-40°C~135°C。应用前需用小样测试。

Nitrile Rubber— A copolymer of acrylonitrile and butadiene. It has excellent physical properties, including resistance to water, petroleum products and fuels. Useful temperature range is -40oC to +135oC. Always request a small sample of the mat to test.

发泡橡胶 Nitricell Sponge

PVC和丁腈橡胶混合配制的黑色的封闭式发泡体,其出色的回弹性远超典型的PVC发泡材质。用做耐磨型抗疲劳地垫的底部,是最柔软、舒适发泡材质。

A black, closed-cell sponge, compounded of a unique blend of PVC and Nitrile rubber for exceptional resilience that far exceeds typical PVC sponge. Used as the underside sponge of most Wear well Sponge Cote? mats, it's considered by many customers to be our softest and most comfortable sponge.

欧姆 Ohm (Ω)

电阻单位。地垫电阻的欧姆数值越高,静电越难从地垫消散到地面。反之,欧姆数值越低,其导电性能越好,防静电效果越好。

A measure of resistance. The higher an ohm reading on a conductive mat, the more difficult it is for the static electric charge to go through the mat and out the ground. Conversely, this means that the lower the ohm reading, the more conductive the material.

PVC发泡 PVC Sponge

也称为乙烯基发泡海绵体,为乙烯基材料混合发泡剂膨胀而成。PVC发泡垫舒适耐用,经济实惠。

Also referred to as blown vinyl sponge, it's a vinyl compound expanded with a blowing agent. PVC sponge mats provide modest comfort and durability at an economical price.

拉伸强度 Resilience

衡量材料拉伸断裂度量(压力数值越高,地垫强度越好)。

The ability of a material to return to its original state after being compressed.

抗疲劳 Anti-Fatigue

当一个人长时间站在坚硬的地面上,腿部肌肉容易紧张并且收缩,导致静脉曲张。长期静脉曲张会促使人们不得不花更多的精力来保持站立的状态,因为,身体很快就会出现疲劳,工作效率也跟着下降。抗疲劳垫为富有弹性材料,可以巧妙地转移人体的重量,促进腿部肌肉的放松,缓解脚部血液流通压力和长时间站立所引起的腿部疲劳,预防因血液不流畅所造成的静脉曲张,从而减少身体的疲劳感,提高工作效率。

When standing on the hard ground for a long time, the leg muscles easy to be nervous and contraction, and leading to varicose veins. Long-term varicose veins will encourage people to spend more energy to remain standing state, because the body will soon appear fatigue, also work efficiency decreased followed. The anti-fatigue mat of elastic material, can be subtly shift the body weight and promote relaxation of the leg muscles, alleviate the blood flow pressure of the foot and leg fatigue caused by prolonged standing, prevention of varicose veins caused by the blood is not smooth, thereby reducing the fatigue of the body, improve work efficiency.

环保材料 Recycling Material

通过将回收的废旧轮胎改进为高质量的地垫,减少废弃物的产生,有助于改善我们的环境。

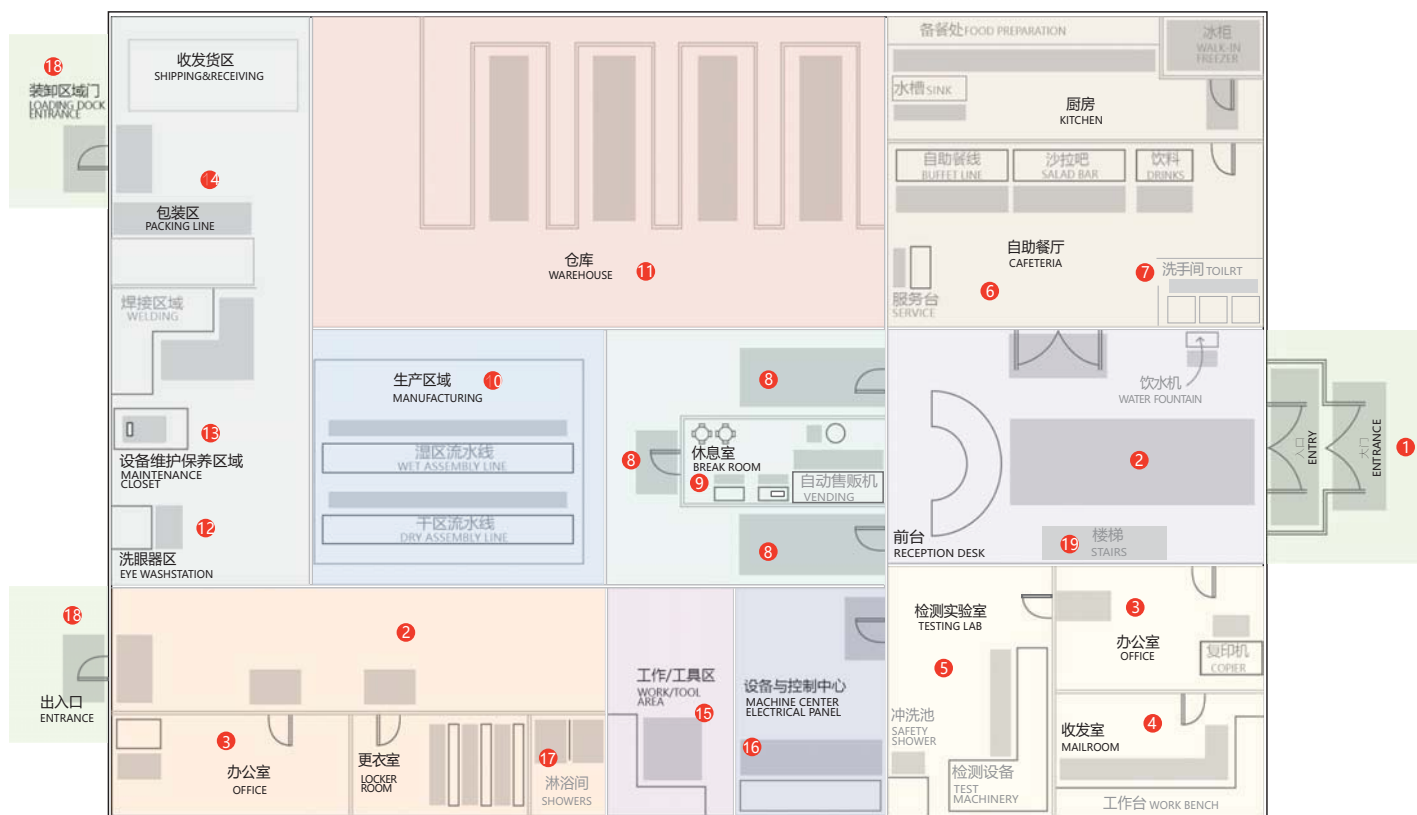

The recycling of discarded tires, improvement for high quality mats, reducing waste generation, helps to improve our environment.
